MINING, BUSINESS AND STOCKS

WEEKS BUSINESS WILL BE HEAVY

Stock Exchange Has Another Record Breaking Morning Session.

SALES UNUSUALLY LARGE.

Nevada Stocks Still Drag, Bulk of Business Being in Utah

If present business conditions keep up on the floor of the local stock exchange, the present week will be one of the biggest in point of business in the history of the exchange. This morning a total of 33,075 shares of stock changed hands, representing a valuation of \$43,865.50, and the previous days ofthis week have not been far from

This morning the open board session atterly outstripped the regular call in point of business. The market was strong and a generally healthy tone prevailed. There was no particular aclivity in any one security, the bulk of the business as usual being in Utah

RUSH KEEPS UP.

Excitement Continues Strong as Ever With no Sign of a Let Up.

Wild excitement is the prevailing condition in the Greenwater country, according to Messrs. A. W. Smith and L. O. Taylor, who have just "arrived from there.

A tremendous rush is taking place, the trails leading into the district bethe trails leading into the district being crowded with vehicles of overy description. Rich strikes are being reported daily, some particularly fine ledges having been found on the west slope of the Funeral range.

A water company capitalized at \$6,000,000, has just been organized, and is now only waiting for materials for pining to arrive a second control of the company of the control of the company of the control of the

The reply of the agement to these criticisms is that, he ore shoot has not been reached ther the north or south face, it is to delay the matter of expensive nament improvements. The enlarge of the old shaft would be nearly, or quite, as costly a work as the ling of a new one in a more sult-locality.

locality. if the completion of the 400 foot from the Tetro's new shaft, which reached within a 100 feet of a point ically below the old works, it is idently expected that the ore shoot be cut at the increased depth and a future development will be acpulshed at one-half the expense forcompletion of the 400 foo

COURT GIVES POSSESSION.

Case of Excelsior Iron Mining Co. Goes In Defendant's Favor.

In the case of the Excelsior Iron Mining company against Thomas J. Jones, the court decided that defendant is the owner of and entitled to possession of the Cora No. 1 lode claim, which is a portion of the Armstrong placer. It was decreed that neither party should be entitled to costs from the other.

MAKE BIG FIND.

Stray Dog Furnishes Sensational News -Indian Camp Ledge Also Struck.

A recent dispatch from Goldfield t. Reno Gazette runs as follows: telegram has just been received by the L. M. Sullivan Trust company from Consulting Engineer John D. Campbell at Manhattan which, following the discovery of sulphides at the 200-foot level on the Manhattan Consolidated last week, is considered sensational in that it is believed to establish the permanency of the Manhattan mining camp beyond peradventire, Campbell's

"The Original Indian Camp ledge has been encountered in the main shaft of the Indian Camp Manhattan Mining company at a depth of 150 feet. This ledge shows on the surface and strikes northeast and southwest, with a dip of 55 degrees to the west. The bottom of the shaft is all in sulphide ore, and we are still drilling in ore showing lots of chalcopyrite and carrying free gold. Have also struck a strong flow of water. On Stray Dog at 150-foot level have broken into nine inches of \$500 ore on hanging wall and two feet of \$15 to \$20 ore on foot wall. Average for three feet is \$200 per ton. Also encountered in shaft this morning

large ledge showing sulphides—as-saying will follow. Advise buying fivedrill compressor at once for dec The discovery is considered one of the most important that has been made during the year and Goldfield people are more than ever interested in the big camp to the northward.

DEMAND KEEPS UP

Public Still Looking for McDonald-Ely, But Holders Are Unwilling to Sell.

It is expected that the stock certificates of the McDonald Ely company will be ready to issue either this even-ing or tomorrow. In the meantime the demand for stock in the new organiza-Applications came in so fast when the stock was offered to the public that it was found necessary to cut down the allotments of each subscriber so that it would be possible for all to get in.

Local holders of the stock refuse to sell under any conditions partially stock. ion continues as strong as ever Local holders of the stock refuse to sell under any conditions notwithstanding the fact that the price offered today amounts to a profit of over 100 per cent on the original cost. Owners are holding their stock not as a speculation but as an investment.

PERMANENT ORE REWARDS EFFORTS

Discussion of Conditions Obtaining in Southern Nevada Camps.

LOTS OF IT IS NOW IN SIGHT.

Industry is Rewarded in Goldfield Mining Circles-Fortunes Made and More in Prospect.

Manhattan, Nev., Nov. 20 .- With the location of high grade shipping ere in place the estate of the Manhattan Combination company passes hattan Combination company passes from the preferred prospect class to the ranks of regular producers, and becomes, in fact, what has for some months been predicted, a mine of the first magnitude. To be sure the property has yet to establish the ore showing which obtains in the Consolidated, Stray Dog, Union No. 9, Jumping Jack, Little Grey, Indian Campand a number of other Manhattan mines, but time and development can be depended upon to do the rest now that the pay crack has been encountered in the permanent ore zone.

STAGE OF DEVELOPMENT.

STAGE OF DEVELOPMENT. At relatively the same stage of de-velopment the combination shows up velopment the combination shows up equally as well as the properties mentioned, with the possible exception of the Stray Dog, and certain it is that the huge Black Mammoth ledge, in which the high gold values on Combination ground are found, is a strong rival in point of mineralization with either the famous Consolidated fissure or the no less celebrated Stray Dog-Union No. 9 ledge. The surface showing on the Combination is one of the very best in the entire camp and compares more than favorably with the gold values secured on Stray Dog ground at grass roots.

HIGH GRADE ORE.

HIGH GRADE ORE. Several months ago Sol, Camp located a streak of very high grade ore in that portion of the Black Mammoth ledge which crosses the Combination estate. The find was followed at surface for a distance of 200 feet, and the ledge stripped of quartz having an average value of \$200 the ton. The vein dipping into the hill an incline was then sent down along it and cline was then sent down along it and always in ore of shipping grade. From the bottom of this incline a drift was run out along the strike of the ledge and has resulted in the location of the same high class gold values in place.

FREE GOLD IN QUARTZ. The face of the drift is filled with The face of the drift is filled with quartz showing gold in the free and assays are secured as high as \$500 the ton. Samples taken at random seldom fail to return shipping values and the "break of the ledge is considerably in excess of \$100 the ton. More than 400 sacks of high grade shipping rock are piled on dump, and as an illustration of the rapidity with which the tonnage is accumulating it can be stated that ore sufficient to fill 100 sacks was mined Friday.

LOTS OF COPPER.

LOTS OF COPPER. The management of the Toquima depth of 130 feet and the incline shaft which is following the dip of the big copper yielding fissure is in ore from surface to bottom. For a depth of about 20 feet from the 40 foot level values depreciated, indicating that the shaft was in the leached zone which in copper carrying ledges invariably pre-cedes water level. The present copper cedes water level. The present copper grade is a triffe better than 15 per cent to the ton, an increase from 6 per cent a few feet below surface. Sinking is to continue until water level is reached where it is expected that the ledge will carry an even higher per cent of the red metal.

CROSSCUTS RUN. At various points in the shaft cross-cuts have been run through the ore for a distance of 12 feet without disclosing either wall, and from present indications the entire mountain is a solid mass of copper carrying matrix. Wherever crosscut below the leached zone the deposit returns an average copper grade of 15 per cent and likewise carries gold and silver values of \$10 the ton. Ore is being sacked and a small trial shipment is to go out shortly.

WATER LEVEL SOON REACHED.

the intention to intersect the ore body with a series of crosscuts and a draft along its strike. The work of blocking out ore will then begin and this in turn will be followed by stoping and the sending out of regular consignments. The property passed the speculative value period some time since as careful tests, made by competent engineers, have proved the deposit to be very rich in copper, the metal occurring largely in chalcopyrites and the ore being readily treated.

ROCK RESEMBLES ARIZONA. the intention to intersect the ore body

ROCK RESEMBLES ARIZONA. In character the rock resembles that mined in the rich copper yielding districts of Arizona, more particularaly that section in which is located the famous Copper Queen mine. In fact, mining engineers who are familiar with the ore occurrencies in that well known property and who have examined the Toquima deposit, state amined the Toquima deposit, state that the two ore bodies are identical in appearance. They opine that the whole mountain on which the Toquima property is located is filled with copper, and that development will prove it to be one of the most valuable deposits of the red metal ever discovered,

HAY FORK LOOKS WELL. Mining District North of Idaho City Gives Great Promise.

Fred J. Kuntz returned to Boise Friday evening from the Hay Fork dis-trict above Idaho City, to rest up a while, says the Boise Capital News. Speaking of the development of this hich section he said:

hich section he said:
"Lee Bunch and associates, who bonded the Unternahrer group, have a force of 11 men at work. They opened up the Switzerland claim down near the creek, where they found the vein 12 feet thick with pay ore all the way across. A streak two feet wide average over \$200 lin gold, mostly free, and a 10-inch streak gave assay values of over \$2,000 in gold to the ton.

"Work is progressing on the Goldbug drift. The vein is being followed into the hill where a depth of 350 feet will be secured. The rich ore is being sacked and the other is piled up near the mouth of the drift. It is the intention to open up the vein and explore it thoroughly across the creek in the Switzerland claim.

"A huilding [8x28 one and a half

"A building 18x28 one and a half stories high has been completed. The kitchen and dining room are below and the sleeping apartments for 30 men are above. It is the intention to increase the force and work all win-

'A miner who has worked at Cripple Creek and Goldfield is employed at the mine and he says it is the best appearing property for the amount of work done that he has seen. He thinks the mine will develop into a bonanza." Mr. Kuntz said it had been either raining or snowing every day for two weeks up to last Friday in the Basin, and the More creek was booming higher than ever before at this time of year. He will return to camp in about two weeks. He had a sample of the ore with him which is a red oxide, and is literally speckled with gold.

CONCENTRATES.

AFFECTED STOCKS

Market Was Under Pressure for Some Time Because of High Rates.

THEY FELL BACK, PRICES ROSE

Continued to Rise in Spots, Movement Narrow and Interrupted by

New York, Nov. 21.-Opening dealings in stocks were in moderate volume and the resulting price fluctuations were narrow with small declines predominating. Anaconda receded 2%, General Electric 1% and Nashville, Chattanooga and St. Louis

A spurt in Reading to 148% had only a momentary effect in relieving the pres-sure against the market which increased considerably when call money was quoted at 9 per cent. St. Paul was driven a point under yesterday's closing and Reading and Union Pacific haif. Prices were somewhat better at 11 o'clock and some of the minor stocks were showing strength. Consolidated Gas rose 5, Pacific Mail 2. Northwestern 13, and Rock Island preferred, Colorado Fuel and Smelting 1. St. Paul preferred gave way 2, and Federal Mining lost 4.

Call money after touching 10 per cent fell back and stocks rose. Industrials were promient in the advances. Delaware & Hudson gained 24, Reading 18, Pacific Mail 34, and Colorado Fuel 24. Prices receded again before noon.

Bonds were irregular.

The tendency of prices became irregularly upward, again shortly after 12 o'clock in sympathy with the marking upof Reading to a new high level. Union Pacific hardened 1. St. Paul preferred centinued to lose ground and showed a loss of 5 points.

Prices continued to rise in spots but the movement was not comprehensive and was interrupted by setbacks. Gains were made in Great Northern preferred of 3. considerably when call money was quot-

the movement was not comprehensive and was interrupted by setbacks. Gains were made in Great Northern preferred of 3, Keokuk & Des Moines 2, Canadian Pacific and Reck Island preferred. Northern Pacific and Union Bag and Tennessee Coal 18, to 184.

cine and thom Bag and reinessee Coal 1% to 1%.

The market closed dull and irregular. The spurt in the Hill stocks and Canadian Pacific did not more than hold the general list against realizing sales and prices ultimately gave way. St. Paul yielded again to a point below last night. The rise in Great Northern preferred had reached 5½. Canadian Pacific 2½. Northern Pacific 2%, and Rock Island, Iowa Central, Amalgamated Copper about a point. Chicago & Alton decimed 1½.

Liverpool, Nov. 21.—Close: Wheat—Dec., 68 334d: March, 68 574d; May. 68 514d. Weather in England today was cloudy and threatening.

For the Affair. The Commercial club is interested in the plans for an Alaska-Yukon exposition to be held in Scattle. In 1909, for the purpose of exploiting the northwest. The exposition will cover 250 acres, and represent \$10,000,000. Special attention will be given to forestry and the lumber indus-

try of the Pacific coast, and the far west, ern states will all be expected to have state buildings. Manager Fisher Harris of the Commercial club is in correspond-ence with the promotors of the exposi-tion, as it is desired that Utah shall take an active part therein.
